S3: Systems for Scientific Success

How do you do 40 years of work in 1 hour?
Attend the S3 Workshop and find out!

The workshop is aimed at early stage researchers, particularly PhD students and early postdocs, but the techniques will be useful to anyone at any stage.

For the last three years, Hugo Schmidt has been teaching a scientific skills workshop which has met with 100% approval. Now, it is being offered to NUS Faculty of Science. Topics covered include the successful way to plan out experiments, how to break down your day to day tasks, and how to win by thinking in terms of systems, not goals.

* Registration is necessary. Sandwiches will be provided.
