

## TEACHING THE NEXT GENERATION

*“The HSBC Environment Discovery Programme marks yet another milestone in the Bank’s longstanding commitment to environmental education in Singapore. We hope that our efforts will help to nurture a strong appreciation of biodiversity in the community, in particular among our children and youth.”*

**Mr Guy Harvey-Samuel**, Group General Manager and CEO, HSBC Singapore.

HSBC Singapore made a gift to set up the HSBC Environment Discovery Programme at the NUS Lee Kong Chian Natural History Museum to help nurture an appreciation of natural history and the environment among school children, Singapore’s next generation of scientists. The Programme is delivered by a team of HSBC volunteers.
